

Student Authentication Policy – Updated July 2016

College at Brockport students taking online (ASY or CMB instructional method) courses must log in to a secure access site using their Brockport user ID and password. All online students who enroll in courses through Brockport are validated using an identity management system that utilizes their unique user name and password for access. Without these identifiers, students are unable to register for classes or access College tools for online courses. The College's policies regarding academic integrity and acceptable use of IT services include penalties for unauthorized access by the use of another individual's name and password and for engaging in academic dishonesty. This policy is available at the following website -

http://www.brockport.edu/policies/docs/policy_on_student_academic_dishonesty.pdf

In the future, when other methodologies to assist with student authentication become more available (e.g., proctoring centers) The College at Brockport will explore their use.
